

Amnet ADSL2+ Plans

DJ Software

Amnet is a Perth based Internet Provider. They differ from most other Internet Providers in that they have their own equipment in the Perth Metro Telephone exchanges. So unlike most other ISP's they are not reliant on Telstra-Wholesale for their connections. They offer fast, competitively priced accounts with excellent service.

NEWSFLASH!

During March 2010, Amnet's data allowances were completely revised & most plans were QUADRUPLED!!!
They were increased again during June 2010
The Data-Allowance table below has been updated!

They were ranked 7th in 2007, 3rd in 2008 and 2nd in 2009 in PC-Authorities ISP annual rankings (this is an Australia Wide independent survey of end users!)

Announcement Quote:

We were given a six star rating for Customer Support, Service reliability and value for Money. This placed Amnet ahead of many other providers like Internode, iiNet, AAPT, TPG, Bigpond (Telstra), Optus and many more...

DJ Software is an authorised agent for Amnet!

- **Note 1:** Amcom is Amnet's parent company name, they are a publicly listed company.
- **Note 2:** Information provided is subject to change, please contact to ensure details are up to date.

Plans (as of 16th August 2010):

Cost / Month	Total Allowance	Peak Allowance	Off Peak Allowance
\$29.00	12 Gig	5 Gig	7 Gig
\$39.00	45 Gig	15 Gig	30 Gig
\$49.00	110 Gig	45 Gig	65 Gig
\$59.00	130 Gig	55 Gig	75 Gig
\$69.00	150 Gig	60 Gig	90 Gig
\$89.00	220 Gig	80 Gig	140 Gig

Notes:

- Data usage on Saturdays & Sunday is **NOT** included in your Peak allowance (but **is** included in your Off-Peak).
- Data from many regular downloads such as Windows Updates is not included in your Peak allowance.
- Allowances listed are per month – unused data allowances do NOT carry over from month to month like some 3G accounts.
- Peak time is 7 am to Midnight.
- Data **uploads** are not counted in your data allowances.
- If you are approaching your download for a month, you can purchase additional data. (e.g. for those times where you might have a busy month. Currently this is \$10 for 1 Gig).
- If you reach your download for a month your speed is reduced to 128K. This is known as shaping & many other ISP's reduce you down to 64K!
- One huge advantage of purchasing through DJ Software is that we look after all the support issues for you. As an authorised agent, we get priority support access. No more hanging on the phone getting frustrated!!!!

Connection Fees:

- 24 Month Contract: Nil
- 12 Month Contract: \$ 79.00
- No Contract: \$149.00

Example ADSL2+ Modems:

- Non Wireless with 4 cable ports from \$ 65
 - Wireless with 4 cable ports from \$ 90
- (These are a guide only – please contact for a quote)

Further Info:

- All prices are inclusive of GST.
- ADSL 2+ potentially provides internet speeds of up to 24 Meg. In reality you can expect speed from between 5 and 15 Meg. This varies due to factors such as the distance you are from your telephone exchange, the quality of the copper wiring to your premises & other factors! As a guide my speed in South Perth is around 15-20 meg. This is at least 50 times faster than 256K ADSL-1 & 10 times faster than 1.5Meg ADSL-1.
- Amnet also offers Naked Accounts and have VOIP facilities offering an alternative to using a traditional Telco for your phone usage – this provides you with very competitive pricing on local, interstate and international phone calls. Further information on VOIP is available on request...
